

Custom Acrylic Drawer Organizers You Design Online

BENEFITS

- Fully assembled, perfect fit
- Organization your way—you design the compartments and divider layouts or choose from templates
- Attractive and modern look
- Eliminate wasted space in your drawers
- Easy to clean—no need to worry about spills and messes
- User-friendly web design tool
- Quick turnaround time—we build and ship in days, not weeks! No minimum order quantities
- Save and modify your designs for future use

SPECIFICATIONS

- Made from durable and attractive 1/8" clear cast acrylic
- Hand-assembled in USA using modern adhesives, strong finger joinery, and tab & slot construction
- Min Size: 2" x 2" x 1"
- Max Size: 39" x 24" x 6"
- Washable—Top-rack dishwasher safe
- Each organizer includes a bottom, four outer walls, and internal dividers—fully assembled
- Cost varies by design size and complexity

CUSTOMERS

- Homeowners & Renters
- Doctors, Dentists & Veterinarians
- Property & Office Managers
- Designers, Builders & Architects
- Industrial & Trade Professionals
- Hobbyists

QUICK

CUSTOM

SIMPLE

“The pieces fit perfectly, the quality is great, and the production time was incredibly fast. Overall, a great experience.”

Frequently Asked Questions

DESIGN TOOL

Is the design tool easy to use?

We sure think so! We have worked diligently to create an intuitive design tool that is easier than most art programs.

How much time does it take to design a drawer organizer?

You can design an organizer in under five minutes if you have your inside drawer dimensions and your ideas ready.

How do I design a drawer organizer?

1. Go to the website design tool [START BUILDING] and enter the desired organizer dimensions and select APPLY
2. ADD, MOVE, and EDIT your compartment divider walls (horizontal and vertical lines)
3. PREVIEW your design
4. Give your project a title and click SAVE DESIGN
5. Select REVIEW/BUY to add your organizer to your cart and checkout

PROPER USE, CARE & CLEANING

How do I clean my organizer? Gentle soap and water normally does the trick. Use a non-abrasive cloth. Dry your organizer immediately to reduce spotting. You can use plastic polish to remove fine scratches or if you want your organizer to really shine! (We use Novus brand). Do NOT use products that contain ammonia, alcohol, acetone, abrasives, finger nail polish remover, window cleaners, or other solvents such as thinners, gasoline, benzene and tetrachloride; these will cloud the plastic surface and may crack and ruin the surface.

Can I put my organizer in the dishwasher? Yes! We've tested our organizers in household dishwashers and they remain strong, clear and clean up nicely. We recommend using the top rack to reduce the chance of deforming.

What if my organizer gets scratched? It is normal to see surface scratches on acrylic during use. You can use a plastic polish and non-abrasive cloth to buff out fine scratches. (We use Novus brand)

Is my organizer heat resistant? Acrylic is a rigid plastic that handles household temperatures well, but will deform if applied to temperatures over 194 F and may melt at temperatures over 212 F. We recommend keeping your organizers away from hot areas like your stove, oven and microwave.

Will my organizer break if I drop it? Probably. Although acrylic is durable and shatterproof, it may crack or break if dropped, so please handle your organizer with care. Although not as fragile as glass, acrylic will crack or break if handled improperly.

Can I use my organizer for food? Please do NOT. The adhesive used during assembly is not listed by the FDA as being food safe. Direct contact with food should be avoided.

PRICING

How much does a custom organizer cost? Our organizers are priced based on each unique design. We calculate the cost based on the size and complexity of your design.

How do I reduce the cost of my custom organizer? Reducing the quantity of compartments and lowering the wall height are simple methods to reduce the cost of your custom organizer.

What methods of payment are accepted? Is it secure? We accept all major credit cards processed through secure, encrypted technology. We do not store your credit card information on our computers or servers. The information is remotely handled by Authorize.net, a third party credit card merchant account system.

MEASUREMENTS

How do I measure my drawer so the organizer fits correctly?

1. Measure the inside dimensions of your drawer
2. We recommend reducing the organizer dimensions by 1/8" to 1/4" from the actual inside drawer dimensions to ensure it slides easily into the drawer
3. If your drawer has any exposed knob/handle screw heads, we recommend reducing the organizer depth an additional 1/8" to 1/4"

What are the dimensions I need to know before designing a drawer organizer?

- Depth = Measurement from front to back inside your drawer
- Width = Measurement from left to right inside your drawer
- Height = Measurement from the bottom to the top of your drawer

What are the size limitations on custom organizers?

- Smallest organizer: 2" x 2" x 1"
- Largest organizer: 24" x 39" x 6" or 39" x 24" x 6"
